Series A Calculation Formulas

Post-Money Option Pool Method

1. Post-Money Valuation:

```
Investment + Pre-Money = Post-Money
CA$400,000.00 + CA$1,200,000.00= CA$1,600,000.00
```

2. Investor Ownership %:

```
Investment ÷ Post-Money
CA$400,000.00 ÷ CA$1,600,000.00= 25.00%
```

3. Founders + Seed Ownership %:

```
100% - Investor% - Target Pool%
100% - 25.00% - 20.00%= 55.00%
```

4. Post-Investment Total Shares:

```
Founders+Seed Shares ÷ Founders+Seed %
396,296 ÷ 55.00%= 720,538
```

5. Total New Shares Needed:

```
Post-Investment Total - Existing Total
720,538 - 407,407= 313,131
```

6. Additional Option Pool Shares:

```
(Target% × Post Total) - Existing Pool
(20.00% × 720,538) - 11,111 = 132,997
```

7. Series A Investor Shares:

```
Total New Shares - Additional Option Shares
313,131 - 132,997= 180,134
```

8. Share Price:

```
Pre-Money ÷ (Existing + New Option Shares)
CA$1,200,000.00 ÷ (407,407 + 132,997) = CA$2.221
```
